# The Oogle

The Oogle is not a beast you can take by *surprise*  
because it's covered all over with great googly eyes!  
It has *eyes everywhere*, where eyes shouldn't be!  
Eyes on its belly, its elbows, even one knee!  
It has eyes on its wings and its shell and the back of its head,  
but it needs lots of eyedrops, to stop them turning *sore and red!*
